### REASONS FOR ALLOWANCE

The applicant's response filed June 14, 2004 to the Office action has been entered.

Claims 16-21, 28-31 and 39-43 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 16-21, 28-31 and 39-43, no prior art has been found teaching or suggesting the method for separating single stranded nucleic acid from double stranded nucleic acid without using alcohol group in the second liquid.

The closest prior art is the reference of Bastian et al. (6,180,778, issued January 30, 2001). Bastian et al. disclose a method for the chromatographic separation of nucleic acid mixtures into their double-stranded and single-stranded nucleic acid fraction by simultaneously absorbing whole nucleic acid to a mineral support (See column 1, lines 7-14). However, Bastian et al. do not disclose the buffer used for separation without alcohol.

As set forth in MPEP, the transitional phrase "consisting essentially of" limits the scope of a claim to the specified materials or steps "and those that do not materially affect the basic and novel characteristic(s)" of the invention (See MPEP, 2111.03). Thus, the limitations of the instant claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
